Application: (Cerebro – Audit Portal)

Worked on cerebro portal as full stack engineer which was developed in Angular9 and NestJs for Wal mart. The aim of this portal is to provide access and search through emails and other documents for audit purposes. This application was text-based search intensive. The application was only accessible inside the Walmart network and single-sign-on was implemented.

Environment: Angular, Angular Material, Bootstrap, NestJs, SQL, Elasticsearch, Jest, Lerna, Jenkins, Kubernetes, Docker and sonarqube.

Application: (Gravity - Intelligent Business Growth)

Worked as team lead on gravity portal which was developed in Reactjs and NestJs for Walmart. The aim of this portal is to provide predictions about future sales in specific areas of the country and stores. The user of the application could change the external factors and get new forecasts according to the trends.

Environment: Reactjs, Bootstrap, NestJs, SQL, Big Query, CDN and GCS, Jest, npm, Jenkins, Kubernetes, Docker and SonarQube.

Application: (Wrench Science)

Worked on wrench science ecommerce portal and admin portal as frontend lead. This portal was developed in Angularjs and shopify. The aim of the admin portal is to run the operations by sales staff and the website is for end users.

URL: <https://www.wrenchscience.com>

Environment: Shopify, Bootstrap, HandlebarJs, Angularjs, CSS and deploybot.

Application: (POC - Time Clock Plus portal)

This POC was done to upgrade the frontend application from AngularJs to Angular15 without writing all the code again. The old modules remain in JavaScript and adding new features in TypeScript.

Environment: Angularjs, Bootstrap, Angular15, Yarn Workspacce.

Organization: **Strategic Systems International**

From: February 2020

To: January 2021

Designation: Senior Software Engineer
